Adding a Zone to a ZFP config via ZTOOLS

Firstly take a download from the panel using ZTOOLS. Then follow the numbered steps below for Fig 1.

- 1. Click on System View.
- 2. Click on Zones.
- 3. Click on the next available text box and add text for the new Zone name.

Fig 1

The steps below and Fig 2 explain how to add the new Zone to a Cause and Effect tree.

For this exercise we have used a zone disablement via a panel switch.

Also see App Note ******* for more information on building a Cause and Effects tree.

1. Click on Cause and Effects.

2. Create a new Cause and Effects tree using the New Zone.
