FIRE ALARM DO NOT SWITCH OFF

POWER ON OFF

Welcome to issue 17, our first unpriced edition of the Detection Supplies catalogue. For prices either speak to your account manager or go to our website for trade price lists.

As always Detection Supplies continues to look for new innovative manufacturers to partner with. In this issue we have added ESP to the mix. ESP have an excellent range of Emergency Lighting in addition to their range of both conventional and addressable fire detection options and also access control, CCTV and security. Speak to one of our team for more details.

The new Morley Max panel can be found on page 32.

The new Haes addressable panel on page 40.

A reminder that this is only a small selection of what we can offer, so please call us if you can't find what you are looking for.

PANELS & ACCESSORIES

CONVENTIONAL FIRE ALARM PANELS

Conventional fire alarm panels are suitable for what are commonly referred to as 4-wire systems, i.e. detectors and call points wired on 2 cores per zone, with sounders and beacons wired on separate pairs. It should be noted that panels come with a varying number of sounder circuits, it does not follow that a 4 zone panel will always come with 4 sounder circuits. These panels are compatible with detectors shown on page 6 & 7.

C-TEC CFP

CFP704-4
- Dimensions W380 x H235 x D96mm
- LPCB Certified EN54
- Max alarm load 1.3A
- Max battery size 2 x 3.2Ah

CFP STANDARD PANELS (Requires up to 2 x 3.2ah Batteries)

CFP702-4	Standard 2 Zone Fire Alarm Panel with Keyswitch or Keypad Access Enable
CFP704-4	Standard 4 Zone Fire Alarm Panel with Keyswitch or Keypad Access Enable
CFP708-4	Standard 8 Zone Fire Alarm Panel with Keyswitch or Keypad Access Enable

CFP STANDARD PANEL OPTIONS

CFP760	Repeater Panel with Keyswitch or Keypad Access Enable
CFP761	Network Communications Card for CFP760

GLOBAL FIRE EQUIPMENT

ORION-8
- Dimensions W273 x H404 x D107mm
- EN54 Compliant
- Max alarm load 1.6A
- Max battery size 2 x 7Ah

ORION PANELS (Requires 2 x 7Ah Batteries) - available in White and Red

ORION-2	Orion 2 Zone Conventional
ORION-4	Orion 4 Zone Conventional
ORION-8	Orion 8 Zone Conventional

ESP

MAG4P
- Dimensions W340 x H290 x D100mm
- EN54 Compliant
- Max alarm load 0.7A
- Max battery size 1 x 7Ah

MAGFIRE PANELS

MAG2P	2 Zone Fire Alarm Panel
MAG4P	4 Zone Fire Alarm Panel
MAG816	8 Zone fire Alarm Panel Expandable to 16 Zones

MORLEY - IAS

FIRE RETARDANT ABS MOULDED ENCLOSURE
- Dimensions: W356 x H318 x D92mm
- 1.8 Amp PSU, 2 Sounder Circuits
- Maximum alarm load: 1.0 Amp
- Maximum battery size: 2 x 7Ah

MORLEY - IAS (Requires 2 x 7Ah Batteries)

HRZ-2E	002-492-222	2 Zone Fire Alarm Control Panel. 2 Detection Zones,2 Sounder Outputs, Surface Mounting, Fire and Fault Relays.
HRZ-4E	002-492-242	4 Zone Fire Alarm Control Panel. 4 Detection Zones, 2 Sounder Outputs, Surface Mounting, Fire and Fault Relays.
HRZ-8E	002-492-282	8 Zone Fire Alarm Control Panel. 8 Detection Zones,2 Sounder Outputs, Surface Mounting, Fire and Fault Relays.

OPTIONS & SPARES

020-772	4 Way Sounder Output Card (1.5A max)
020-747	8 Way Input / Output Card. Provides up to 8 Configurable Relay Outputs or up to 4 Inputs and 4 Outputs.
020-745-008	Spare Installation Kit 8 Capacitor EOL, Battery Lead, Allen Key, Panel Control Key and Sounders EOL Resistors.
020-417	Active End Of Line Kit For Panels
020-865	Spare Red Controls Key (Pack of 10)

CONVENTIONAL FIRE ALARM SYSTEMS

HAES TECHNOLOGIES

ECLIPSE PANELS (Requires 2 x 3.2Ah Batteries)

ECL-2	Eclipse 2 Zone Fire Alarm Panel, 4 Wire or Sav-Wire
ECL-4	Eclipse 4 Zone Fire Alarm Panel, 4 Wire or Sav-Wire

ECLIPSE SPARES

FMK-ECL	Eclipse 2 & 4 Zone Recessing Bezel

EXCEL PANELS (Requires 2 x 7Ah Batteries)

XLEN-4	Excel 4 Zone Fire Alarm Panel 4 Wire or Sav-Wire
XLEN-6	Excel 6 Zone Fire Alarm Panel 4 Wire or Sav-Wire
XLEN-8	Excel 8 Zone Fire Alarm Panel 4 Wire or Sav-Wire
XLEN-12	Excel 12 Zone Fire Alarm Panel 4 Wire or Sav-Wire
XLEN-R12	Excel 2-12 Zone Fully Functional Repeater Panel

EXCEL SPARES

FMK-XLEN	Excel 4-12 Recessing Bezel for Excel 4-12 Zone Panel
KEY134	134 Key for Panel (x2)

HAES

ECLIPSE 2 & 4 ZONE CONVENTIONAL

- 4 Wire or Sav-Wire, switchable 2 wire option
- 1 amp power supply, fire & fault relays
- Maximum battery size: 2 x 3.2Ah
- Dimensions: W308 x H260 x D80mm
- 2 sounder circuits

EXCEL 4-12 ZONE (EXPANDABLE) CONVENTIONAL

- 4 wire or Sav-Wire, switchable 2 wire option
- 3 Amp power supply, fire & fault relays
- Maximum battery size: 2 x 7Ah
- Dimensions: W460 x H310 x D85mm
- 4 zone = 2 sounder circuits, 6 & 8 Zone = 4 Sounder circuits, 12 Zone = 6 Sounder circuits.

[1] Source: IHS Markit Report – 2018

EN54-23 is the latest standard for Visual Alarm Devices (VADs) where visual alarm is required to reinforce or replace audible alarms. Typical application:-

- Warning for those with hearing impairments
- Operating theatres
- Recording studios
- Where a staff alert only signal is required
- Areas with high background noise
- Please note – if VADs are required, an illumination of not less than 0.4 Lux must be achieved at floor level.

thefirebeam™

Winner of the fire industry international awards for product innovation......
thefirebeam is the ultimate optical beam detector available today, it has addressed all the problems you normally associate with this type of detection.

What makes thefirebeam so special ?

Its the first **motorised self aligning** reflective optical beam smoke detector to be launched onto the market....that after following a simple procedure will self align at installation, saving time, aggravation and the uncertainty of **misalignment**, all of which cost time and money. Once aligned **it will continually re-align itself against building movement,** saving time and the disruption of high level re-alignment and more importantly **reduces expensive false alarms** and will keep your reputation intact.
The low level controller means all beam settings can be changed and monitored at floor level (such as threshold and time to fire), no more climbing to the beam head to make adjustments. Using only 3mA in any state it is **possible to make thefirebeam addressable using a manufactures interface**, that in some cases can be zone powered. **The**firebeam with all its advanced features is being hailed as the industry favourite
"thefirebeam - a reliable effective alternative to air sampling and spot detection at considerably less cost"

Accessory range the standard firebeam comes with a low level controller and one reflector that covers a range of 7-70 metres. Longer distances can be achieved by using our range kits below.

Mid Range Kit extends the range of your firebeam to 70/140 metres made from clear acrylic and pre-drilled with unistrut friendly holes

Long Range Kit extends the range of your firebeam to 140/160 metres made from clear acrylic and pre-drilled with unistrut friendly holes
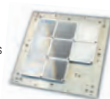

Adapter Plate made from clear acrylic and pre-drilled with unistrut friendly holes you can fit ether the head or single reflector to this

Anti Fog kits and Reflector In some applications condensation can cause a problem, to solve this we have developed reflectors and lens covers that are specially coated and will not mist over. Available as a retro fit kit of lens and single reflector, or single reflectors

ALARMLINE II DIGITAL CABLE

Alarmline II Digital sensor cables are a flexible, durable and cost-effective form of fire detection, suitable for protecting a wide range of commercial and industrial applications. They provide flexibility in installation, enabling them to be used for general area protection or proximity detection close to a specific point of risk. A wide range of alarm temperatures, protective coatings and installation fixings ensure system design and installation is specific to the risk. Alarmline II Digital sensor cables are especially suited for confined areas and harsh environmental conditions, which prohibit the use of other forms of detection.

Alarmline II Digital sensor cables can be easily integrated to any fire control panel through a monitored input i.e. conventional detection zone, Zone Monitor Unit or Switch Monitor Unit. The Digital Location Control Unit provides additional functionality to the Alarmline II Digital sensor cable system by being able to determine the alarm location along extended lengths of digital sensor cable (up to 3000m).

ALARMLINE II ANALOGUE SYSTEM

Alarmline II Analogue Linear Heat detection systems are a flexible, durable and cost-effective form of fire detection, suitable for protecting a wide range of commercial and industrial applications.
They provide flexibility in installation, enabling them to be used for general area protection or proximity detection close to a specific point of risk. A wide range of alarm and pre-alarm temperatures, protective coatings and installation fixings ensure system design and installation is specific to the risk. Alarmline II Analogue sensor cables are especially suited for confined areas and harsh environmental conditions, which prohibit the use of other forms of detection.
Alarmline II Analogue control unit provides monitoring of the sensor cable and allows full integration with any fire alarm control system.

ASPIRATING SMOKE DETECTION

Aspirating Smoke Detection (also known as "Air Sampling") is a method of smoke detection where a sample of air from the protected area is drawn into a pipe & passed through a Laser Detection Chamber for analysis. These systems are not intended to compete with standard point detection devices where cost, ease of installation & compliance are the main criteria, but are designed for
areas of high risk from fire where early warning is imperative, or where consequential loss would
be high value.

VESDA®
by xtralis®

A

VESDA VLI

The VESDA VLI is an industrial-strength detection category that will benefit customers in critical but often harsh environments. With its patented, innovative technology, the VESDA VLI sets a new benchmark for reliable, absolute smoke detection in industrial applications including mining, manufacturing, processing plants, petrochemical plants, power generation facilities, waste treatment plants and more.

B

VESDA VEP

The VESDA-E VEP Series of Aspirating smoke detectors extend the reach of the VESDA-E platform to a wide range of applications. VEP sensitivity range is from 0.005 to 20% obs/m (0.0016 to 6.25% obs/ft) and provides upto 40 class A holes. VEP is equiped with a powerful aspirator that provides a total of 130m (427ft) in the one pipe model and 560m (1837ft) in the four pipe model. VEP also provides staX support, ethernet, wifi, usb and VESDAnet capabilities. .

C VESDA VLF (LASERFOCUS)

The VESDA VLF delivers the most advanced and cost-effective aspirating smoke detection technology for small environments. The VESDA VLF-250 model protects areas up to 250m^2 (2,500 sq. ft) and the VESDA VLF-500 model covers up to 500m^2 (5,000 sq. ft). In addition to the features found in all Xtralis Laser products, VESDA VLF provides a new range of features and built-in intelligence for quick installation, commissioning and servicing.

REMOTE DISPLAYS & PROGRAMMERS

The VESDA display module monitors and reports the status of a detector, providing visual representation of smoke levels along with all alarm and fault conditions. For monitoring convenience, multiple displays can be associated with a single detector. The menu-driven VESDA Programmer allows the user to conveniently configure, commission and maintain the VESDA system, as well as program each individual detector. Only one programmer is needed to support the entire network. Display and programmer modules can be mounted in a detector unit separately (connected via VESDAnet), in a single remote mounting box, or in a 19-inch sub rack.

SAV-WIRE - TRIED & TESTED 2 WIRE CONVENTIONAL FIRE ALARM SYSTEM

The Sav-Wire system is the original 2 wire concept, using standard Apollo Series 65 or Hochiki CDX detector with dedicated Sav-Wire bases & call points.

Any conventional low current 24V DC sounder can be wired onto the same pair as the smoke detectors.

EVACUATOR

SYNERGY+

Designed specifically for construction projects and temporary sites, the brand new Evacuator Synergy+ range features impressive durability and boasts a user-friendly interface. The Synergy+ range not only has a new design, but a brand new in-house designed chip, INFINITY 2, allowing users to access their system through cloud based remote monitoring and store up to 250 devices in one system. A secure mesh network can be created that is unique to your site and will not interfere with neighbouring sites that may also be using Synergy+ products.

SOFTWARE & DOWNLOAD LEAD

| 020-891 | Morley-IAS USB Upload / Download Lead. The Lead Provides the Interface between a PC and any Morley-IAS Fire Alarm Control Panel. |

A

Multi Protocol Fire Alarm Panels with loop drivers for use with Apollo XP95/ Discovery, Hochiki ASX or System Sensor devices Compatible with repeater panels from the ZX range

- 500mA Loop Current
- 2 x Programmable Sounder Circuits
- 3 Amp PSU
- Space for Batteries – 2 x 7Ah in 1 Loop or 2 x 17Ah in 2 & 4 Loop
- Size - 1 Loop H260xW390xD147
- Size - 2 & 4 Loop W392xH390xD147

B

ZXSE panels are constructed on a modular format. Select the base panel required and then add loop cards, communication modules etc. ZXSE panels are suitable for networking applications or communicating to a computer graphics package.

- 500mA loop current
- 2 x Programmable Sounder Circuits
- 2.5 Amp PSU
- Space for batteries - 2 x 12Ah in 1 & 2 loop panels, and 2 x 24Ah in the 5 loop panel
- Size -1 & 2 loop H400xW400xD135 and 5 loop H500xW500xD195

C

D

Repeater Panels
- 24V
- Size H165 x W254 x D50

N.B. ZX panels require a FPM795-004-001 RS485 card to work with repeaters.

The New Apollo Addressable Panel from Haes

NEW G-ONE FIRE ALARM PANEL

The G-One is a versatile compact addressable Fire Alarm Control Panel which can be surface or recess mounted. The powerful cause and effect programming capabilities along with enhanced system diagnostics performance makes this control panel suitable for a wide range of applications from small to large buildings or sites with complex multiple areas.

ANALOGUE / ADDRESSABLE ALARM SYSTEMS

SYSTEM SENSOR

SENSOR DETECTION DEVICES

A	22051E-26	Optical Smoke Sensor, White. Requires B501AP base
	22051TE-26	Multi-sensor Combined Optical Smoke Sensor and Thermal Sensor in a Single Housing, White, Requires B501AP Base
	52051E-26	Heat Sensor, 58°C, White. Type A1R. Requires B501AP base
B	52051RE-26	Heat Sensor, 58°C and Rate of Rise, White. Type A1R. Requires B501AP Base
	52051HTE-26	Heat High Temperature Sensor, 78°C, White. Type BS. Requires B501AP Base

DETECTION DEVICES WITH ISOLATOR

22051EI-26	Optical Smoke Sensor c/w Isolator, White. Requires B501AP Base
22051TEI-26	Multi-sensor Combined Optical Smoke Sensor and Thermal Sensor c/w Isolator in a Single Housing, White, Requires B501AP Base
52051EI-26	Heat sensor, 58°C and Rate of Rise c/w Isolator, White. Type A1R. Requires B501AP Base

BASES

C	B501AP	Analogue Sensor Base with SEMS Screw Connections for Isolated and Non-isolated Detectors and Address Identification Label
	B524IEFT-1	Deep Analogue Sensor Base with Built-in FET Isolator with SEMS Screw Connections and Address Identification Label

CALL POINTS

M5A-RP01FG-X999-03	Addressable Manual Call Point. Glass Element
M5A-RP01FF-X999-03	Addressable Manual Call Point. Flexible Element

M5A-RP02FF-X999-03	Addressable Manual Call Point with Built-in Isolator. Flexible Element

BASE SOUNDERS

BSO-PP-N00	Addressable Loop Powered Base Sounder, EN54-3 Approved. White
BSO-PP-I00	Addressable Loop Powered Base Sounder, EN54-3 Approved. White. Built-in Loop Isolation

BASE SOUNDER BEACONS

BRS-PC-I00	Loop Powered EN54-23 C Category - Standard Performance Detector Base Sounder Strobe. Red Flash, Pure White Body, Clear Lens
BRH-PC-I00	Loop Powered EN54-23 C Category - High Performance Detector Base Sounder Strobe. Red Flash, Pure White Body, Clear Lens
BGL-PC-I00	Loop Powered EN54-23 C Category - Base Sounder Strobe. Red Flash, Pure White Body, Clear Lens
DSS-PC-N00	Loop Powered EN54-23 Open Category Detector Base Sounder Strobe in Pure White with Clear Lens and Red Flash. Non-isolated version. Features B501AP Base for fast and simple installation for System Sensor Detectors and a choice of sound output levels and tones selectable from the device or panel.
DSS-PC-I00	Loop Powered EN54-23 Open Category Detector Base Sounder Strobe in Pure White with Clear Lens and Red Flash. Isolated version. Features B501AP Base for fast and simple installation for System Sensor Detectors and a choice of sound output levels and tones selectable from the device or panel.
IBS-LIDPW	Pure White cover plate for base sounders. Pack of 10.

WALL SOUNDERS/STROBES

D	WSO-PR-N00	Wall Sounder - Wall Mounted, Addressable, Loop Powered Sounder, EN54-3 Approved, Red
	WSO-PP-N00	Wall Sounder - Wall Mounted, Addressable, Loop Powered Sounder, EN54-3 Approved, White
	WSS-PR-N00	Wall Sounder - Addressable Loop Powered Base Sounder, EN54-3 Approved, with Visual Indicating Device (VID), White Body, Clear Lens with Red Flash. Not Isolated. This product is not approved to EN54-23 (Visual Alarm Device) and must not be used as a visual alarm device to provide a primary warning notification of fire.
	WST-PC-N00	Wall VAD - Wall Mounted, Addressable Loop Powered EN54-23 O Class Compliant (W-1.68-1.68) Clear Lens with Red Flash. Not Isolated.

WALL SOUNDERS/STROBES WITH ISOLATOR

	WSO-PR-I00	Wall Sounder - Wall Mounted, Addressable, Loop Powered Sounder, EN54-3 Approved, Red with Built-in Loop Isolation
	WSS-PC-N00	Wall Sounder VAD - Wall Mounted, Addressable, Loop Powered Sounder, EN54-3 Approved, with Visual Alarm Device (VAD), EN54-23 O Class Compliant (W-1.9-1.9). Clear Lens with Red Flash. Not Isolated
E	WSS-PR-I00	Wall Sounder VID - Wall Mounted, Addressable, Loop Powered Sounder, EN54-3 Approved, with Visual Indicating Device (VID), Red Lens. Built-in Loop Isolation. This product is not approved to EN54-23 (Visual Alarm Device) and must not be used as a visual alarm device to provide a primary warning notification of fire.

SOUNDER/STROBE BASE OPTIONS

BPW	Addressable Deep Base for Detector and AV, White
BRR	Addressable Deep Base for Detector and AV, Red
WRR	Addressable Sealed Deep Base for Detector and AV, Red

MODULES

	M210EA	Single Input Monitor Module. Requires M200E-SMB for Surface Mounting or M200E-DIN for Mounting to DIN Rails.
	M220EA	Dual Input or Monitor Module. Requires M200E-SMB for Surface Mounting or M200E-DIN for Mounting to DIN rails.
	M221EA	Dual Input and Single Control Output Combination Module. Requires M200E-SMB for Surface Mounting or M200E-DIN for Mounting to DIN Rails.
F	M201EA	Output Control Module. Requires M200E-SMB for Surface Mounting or M200E-DIN for Mounting to DIN Rails.
	M201E-240	Output Control Module. 240V AC Relay Contact Rating, Complete with Surface Enclosure.
	M210E-CZR	System Sensor Zone Monitor Module (Requires SMB500 Box)

MODULE MOUNTING BOX

G	M200E-SMB	Surface Mounting Box for M2xx Series Modules.

ARROW ELECTROMAGNETIC DOOR CLOSERS - CARE HOMES, HOSPITALS, SCHOOLS

The A624 range of door closers are a multi-functional fire door closer with a 24V magnetic holding device incorporated within the body which can be configured to hold open at 90˚ or operate in "Swing Free Mode", i.e. behave as if no hydraulic closer were fitted and left open at any convenient angle. When the power is switched off or interrupted by a signal from a fire alarm system, the door will then fully close.

Today, the issue of safety is more important than ever. At TOA, we have developed a reliable and energy-efficient voice alarm system that combines all functions in a single device. Whether in airports, hotels, offices, hospitals or schools, the flexible system architecture makes it scalable and expandable for all size requirements.

Full TOA range now available from Detection Supplies!

We supply sound, not equipment.

2 Slide the LINIAN Clip over the cable, so that it is seated in the rounded area.

3 Compress the LINIAN Clips legs and simply insert into the hole by hand.

FIREFLY FIRE SAFETY CLIPS

Firefly clips meet the requirements of the BS7671:2018 wiring Regualtions to secure all surface cables with metal clips, Preventing fire-fighting and people escaping burning buildings from becoming entangled.

The 18th Edition regualtions which came into effect from January 2019 prohibit non-metallic clips or plastic trunking as the sole means of support.

Firefly clips have been specially developed with a new, flexible design to make them suitable for all popular siazes of plastic trunking. Firefly clips feature rounded ends, preventing damage to cables and injury to electricians

Whats more, their spring-loaded design makes it straightforward to add or remove cables in the months and years after installation. The full rainger included a variety of clips to secure cables both instide and outside trunking and conduits.

ZONE PLANS

Zone plans are required for every fire alarm system, under the current recommendations. These show the division of the building into zones, using a different colour for each zone. A simple plan of the building, or full architectural plans can be used to provide a clear representation of the building.

These plans are printed onto 5mm acrylic, then mounted on the wall with silver anodised stand-offs. The acrylic can be clear, white or frosted, to suit the decoration and give a truly professional and contemporary finish to the fire alarm system.

These glow in the dark zone plans are printed on 1.5mm this rigid plastic, offering fantastic durability. Perfect for care homes, hotels, schools and industrial sites too. Fire zones are printed in a diagonal hatch style, maximising the impact of the photo-luminescent plastic.

These plans are framed with a stylish silver anodised finish, with clear plastic flexible cover suitable for all types of premises. The plans are loaded into the front of the frame making it easy to change the plan should it become inaccurate after building changes.

Terms & Conditions

Catalogue

· This catalogue is a guide only. All descriptions, illustrations, drawings, dimensions, weights, measure, specifications, standards of performance or other descriptive matter are for guidance only and shall not form part of a contract. All goods are sold subject to the prices and any relevant discount ruling at the time of delivery. Our prices, discount rates and conditions of sale may be altered at any time without notice, due to manufacturer price increases or similar changes, within the life of this catalogue.

Deliveries

· We offer same day dispatch to all our customers (subject to stock availability) for orders placed before 3:00PM. In most UK destinations this means a next day delivery, any time up to 6:00PM. Timed deliveries are available on request. Orders below £250.00 will be charged at the standard rate. Orders above £250.00 are free for a standard next day delivery. Additional charges apply to timed and Saturday deliveries.

· Any discrepancies or shortages found on deliveries must be notified to us within 24 hours of receipt of the delivery.

Returns

· All products are subject to the manufacturers' conditions and policies and are beyond our control.

· Faulty products within the warranty period must be authorised by the returns department, giving a full description of the fault, date and document number relevant to the sale, before they are returned. Some items found to be faulty within the warranty period are sent back to the manufacturer and may be repaired, not replaced. If tested and found not to be faulty the product will be returned to the customer. In some cases the manufacturer will levy a charge against non-faulty items, or fault/damage caused by installation error. Any such charge, including carriage charges, will be passed on to the customer and no credit will be issued.

· Advanced replacements will be invoiced at full cost. In the case of a non-credit account customer, payment will be required before goods are dispatched.

· Non-faulty items should be authorised by us before they are returned. Detection Supplies is not obliged to take any product back. Products purchased more than 3 months previously will not be accepted back for credit. Specials will not be accepted back for credit. Products that have damaged packaging or packaging that has been modified or written on will not be accepted back for credit. Any products that we do agree to take back will be subject to a minimum re-stocking charge of 15%.

· Any returns to Detection Supplies must be recorded delivery. In the event of a missing parcel, proof of delivery will be required.

Additional 'Terms of Business' applies, a copy of which is available on request. Contact us for details.
E&OE - Although we strive to keep this document as accurate as possible, we cannot be held responsible for any errors and omissions.
